HECULEAN TASK FACES ENGINEERS AT PANAMA CANAL

Ten Million Cubic Yards Block Waterway; May Be Closed to Traffic All Year

[Associated Press by Federal Wireless] PANAMA, C. Z., Oct. 11.—The Panama canal, now blocked by a series of slides at the Gaillard section of the great Culebra cut, will be closed for many weeks to come, and the prospect of opening the big waterway even temporarily before the first of next year is now considered hopeless.

Such was the announcement officially made last night, after the canal engineers had completed a careful survey of the Gaillard section and tested the area of the bank showing the effect of the slides.

The engineers have turned in their reports and their estimates, based upon which the announcement is made that with all the dredging machinery available there is no prospect of removing enough of the earth to open a temporary channel before the end of December.

The estimates are that 10,000,000 cubic yards of earth are in motion and will have to be scooped up and transported out of the cut before the restoration of the permanent channel can be completed.

Millions of tons in slides. The motion area above the cut extends over 175 acres, throughout the length and breadth of which the surface shows that it is sinking and moving toward the canal. The face of the cut for a distance of 2700 feet is affected and the depth of the huge earth prison extends back from the center line of the canal for an average distance of 1800 feet.

To remove this immense mass of earth and rock means doing over again more than 10 per cent of all the excavation that has been done in the great Culebra cut, from which, including previous slides, it is estimated that 97,000,000 cubic yards have been dredged, one-half of the entire excavation for the canal, including the dredging done by the French pioneer company.

APRIL MEETING
TO BE HELD AT
KALANI CHURCH

In response to an invitation from Kaimukapu church the delegates to the semi-annual convention of the Oahu Evangelical Association at Waiwae last week decided upon the new Kalani edifice as the place for their next meeting, which will be held on Wednesday, April 16, 1916.

The convention came to a close Friday afternoon after a successful two-day session. S. W. Kekuewa, who now is pastor of the Hawaiian church at Waiwae, announced that he had accepted a call from the Waiwae church. Samuel K. Kamalopili, who will be ordained a minister within a short time, may be appointed as pastor of the Waiwae church.

Yesterday afternoon given over to a hokey, or exhibition by the Sunday school of the association. A concert was held at Waiwae last night to help defray the expenses of the convention.

Speaking of the results of the convention, Rev. Henry P. Judd, one of the delegates from the Hawaiian Board of Missions, says:

"The work done at the convention showed the expanding scope of the Hawaiian board's activities among the different races, especially the Chinese and Filipinos. Not only are there two new churches among the Filipinos and Chinese, but several new ministers as well."

VICTORIA STRICKEN
WITH TYPHUS FEVER
AND MANY ARE DEAD

[Associated Press by Federal Wireless] LONDON, Eng., October 9.—A Reuters despatch from Melbourne, Australia, says an epidemic of typhus fever has broken out in the state of Victoria. Four hundred and forty-seven cases of the malignant disease have been reported and of these, the despatch says, a hundred and thirty-four already have proven fatal.

"SILENT COPS" AT HILO
WILL DIRECT TRAFFIC

HILO, October 8.—As the county cannot afford to employ extra traffic cops to place at the corners of streets so as to direct the automobiles how they should go, a "silent cop" has been invented and will be placed at the different crossings. The "silent" one will be something like a scarecrow—minus the usual rag—and will consist of a pole bearing a placard and carrying the words "Keep to the Right," "Turn Around Here," "Slow Down" and other signs to fit the requirements of the case.

CARRANZA GETS RECOGNITION AS MEXICO'S RULER

Peace Conference Reaches Decision; "First Chief" Promises Reign of Justice

[Associated Press by Federal Wireless] WASHINGTON, Oct. 10.—The official representative of the six leading South American republics, members of the Pan-American conference on the Mexican situation, yesterday reached an agreement that they would each recommend to their respective governments the formal recognition, in cooperation with the United States, of "First Chief" Carranza as the de facto president of Mexico and the Carranza party as the de facto government of the revolution-ridden republic.

VILLA DECLARES HE
WILL KEEP ON FIGHTING

WASHINGTON, Oct. 11.—Gen. Carranza, who will soon be recognized as de facto ruler of Mexico, will grant amnesty to those who are opposing him as soon as peace is restored, but not before. This statement, according to Vera Cruz despatches, was authorized by the first chief yesterday.

Coincidentally George C. Carothers, American consul general, wires from Juarez, where he has been conferring with Gen. Villa, that the "second chief" announced that it is his intention to keep up the fight. Gen. Villa says he will soon be able to show that Gen. Carranza's supremacy is only temporary.

There is a significant absence of information in the despatch of Mr. Carothers on the subject which has been working the state department. No mention is made by the consular agent of any withdrawal by Gen. Villa of his agreement to protect foreigners. Bloodshed is feared.

Previously it had been reported that upon recognition of Gen. Carranza, Gen. Villa would withdraw the protection of foreigners and that much bloodshed might ensue.

Gen. Carranza's new stand, it is reported, is taken on the ground that to grant amnesty upon his recognition would be to permit the return of what he is now forced to endure—imprisonment within the republic. This is not to be considered, he declared, in view of present conditions.

When Gen. Villa has been decisively defeated and order restored in all parts of the country and when a new governmental machine is smoothly in motion, he will issue a decree, he says, which will permit all his foes to come under his dominion without reprisals. Carranza is pleased.

Gen. Carranza made no secret of his pleasure over the news from Washington that he had won the long fight and would be recognized. "Recognition of my administration puts an end to all efforts of our enemies in the interest of foreign intervention," he said. "The civil war in Mexico is nearly over now. There will be no more big battles. Practically all that remains to be done is to quell minor outbreaks and lawlessness."

Recognition of Gen. Carranza, it has been learned, will be given probably within a week. This is earlier than had been anticipated.

BAD BUSINESS
DRIVING MANY
FROM COLONIES

Discontent with business conditions is rife in the great British colonies of Canada and Australia. If the letters which reach the Promotion Committee can be taken seriously.

Hardly a mail comes in which does not contain one or more letters from heads of families who find conditions at home intolerable and wish to settle in some other country. The letters do not come so much from the element of wanderers who change for the sake of change, but from laboring men and mechanics who have families to support and who can only be driven to consider a long move by absolute necessity.

A letter came in Saturday from J. F. Muir of Waga, N. S. W., Australia, stating that the taxation in Australia was so terrific and the general living conditions so uncomfortable that he is forced to consider a move and wants to know about conditions in Hawaii.

Other letters arrive continually from other parts of Australia, New Zealand and Canada.

DEAD MAN DRIVES
AUTO THROUGH RUTS IN
CALIFORNIA DESERT

SAN BERNADO, Cal.—D. H. Kent, a prosperous Ohio farmer, died from heart trouble on the desert fifteen miles from Ludlow, Cal., and his lifeless body remained upright at the wheel of his automobile without members of his family realizing for a time that death had come. The road has grooves so deep it is unnecessary for drivers to steer. Kent was on his way to the San Francisco exposition.

ASSOCIATION OF KULA RANCHERS HAS MADE GOOD

Cooperative Plan Works Out Well; Much Produce Disposed of in First Year

The Kula Farmers' Cooperative Association has completed the first year of its existence. It was organized October 10, 1914. Until February of this year it was engaged only in selling produce. At that time it undertook the buying of groceries and supplies for its members, in addition to handling their crops.

On September 30 the books showed the following statement of its affairs. In considering this statement it is important to bear in mind that the aim of the association has been to serve its members at cost—that is, to make only enough charges to cover expenses. The association is purely cooperative in its aims and methods.

Assets.
Merchandise (inventory) \$28.90
Produce (inventory) 204.25
Cash 59.19
Money due 539.89
\$1132.23

Liabilities.
Money association owes to farmers \$68.05
Capital stock 225.00
\$193.05

The association has handled about \$5500 worth of crops at a cost to the farmers of about \$40, less than 1 per cent.

It has furnished them \$2375 worth of groceries and supplies, making a charge of 4-1/2 per cent over the cost of the goods. The gross profit has been about \$100 and the expenses in connection with the furnishing of supplies (rent of a storehouse and labor) \$55, so that there has been a net profit on that part of the work of \$45.

The total expenses of the association, other than rent and labor, have been about \$170, including its equipment of scales, stencils, etc., so it is still somewhat behind, the profits from all sources not having yet caught up with the initial expenses.

HILO PLANNING FINE TIME FOR 10TH COMPANY

Ball Game Will Be Played While Men From De Russy are at Big Island Metropolis

[Special Star-Bulletin Correspondence] HILO, October 8.—On the island of Hawaii, during the month of December, there will be quite a number of Uncle Sam's soldiers and officers. In addition to the men of the 25th Infantry, who will be constructing the Mauna Loa trail, there will be the 10th Company, Coast Artillery, which will arrive at Hilo on December 5 and will at once proceed to the armory, where their headquarters will be established.

From December 5 until December 8 the men will be taking in all the sights in and around Hilo and on the latter date they will leave for the Volcano, where a camp that will last for some days will be established. The men will camp just below the hotel on the flat, and from there they will make their excursions to Wonderland.

After "doing all the sights" in the vicinity of the volcano, the men will start on a hike that will eventually land them at Kapoho, where they will, six days after the start from the volcano, hit the railroad track and board the train for Hilo. On Monday, December 20, the soldiers will sail for Honolulu and be back at Fort De Russy for Christmas.

While on the Puna hike the men will visit Panau, Kalapana, Kaimu, Pohiki and all of the beautiful coastal region of Puna. While in Hilo at the beginning of their visit the soldiers will play a ball game against a local team. The artillerymen play some ball and when they tackle the Hilo bunch on December 6 there should be some fun and sport.

GIRL LOST IN DESERT
CRAWLS FOR MILES

NEEDLES, Cal.—Lost in the desert, forced to crawl for miles on her hands and knees during the night and finally rescued by a railroad engineer as she lay unconscious on the tracks, were the adventures that befell Miss Louise M. Pearson, aged 22, of Oakland, who is in a hospital here after an unsuccessful search for a lost mine in the Mojave desert.

Miss Pearson left Ludlow a few days ago on horseback for a spot in Old Dad mountains to locate a mine. Ten miles out her horse threw her. Her ankle was so severely sprained she could not walk, and the horse, carrying food supplies, raced away. She was rescued by Engineer Frank W. Jackson. Physicians say she will recover.

IN WAR ARENA GAS AND FLAMES FAIL TO DISLODGE FRENCH

LONDON, England, Oct. 10.—Paris announces that with poison gas, flame projectors, asphyxiating bombs and other German inventions for trench fighting the Teutons have endeavored to regain some of the positions taken from them in each case being repulsed, while both the British and the French have advanced against the retreating Germans, adding fresh gains to those of the past week.

Along the entire Artois front there have been artillery battles, these being the most violent before Turenne, in the Champagne. The French are not only maintaining their positions here but have silenced some of the German batteries and strengthened their hold on the important Turenne crest.

Southeast of Neuville and at St. Vast, north of Arras, the Germans charged and threw a gas cloud, which failed to shake the French defense, however, and the attack was repulsed.

Teutons Lose Trenches. Official reports from Sir John French announce that the Germans have lost heavily in the offensive attempted by them against the new British trenches south of Labassee canal. Here also gas was used without effect, the British charging through the gas fumes and gaining fresh trenches. The British advance in some places was a thousand yards, while in no place along the new front were the gains less than five hundred yards.

The Germans had no opportunity to rescue their wounded and the ground over which the British advanced was covered with German bodies. The main British gains are northeast of Loos, between Hill Seventy and Hulluch.

In direct contradiction to these reports are those from official German sources, which state that the British attempts to advance southwest of Loos resulted in German gains of ground, while the British were repulsed with heavy losses northeast of Vermelles, in the LaBasse canal region.

In the Champagne, says the Berlin report, the French invaded the German lines east of Navarin at certain places, but were later driven out, leaving prisoners in German hands.

In the bitter contest for possession of the hill south of Leintrey, the French were finally defeated.

REVENTLOW DEFENDS TURK METHODS IN ARMENIA

BERLIN, Germany, October 10.—Von Reventlow, in a signed article in the Berliner Zeitung yesterday, replies to the appeal made by Viscount James Bryce to America to take action to end the alleged Armenian atrocities, and answers the American criticisms of Germany for not bringing pressure to bear upon the Porte to modify its attitude towards the Christian residents of Syria.

Von Reventlow states that the matter of the Armenian uprisings against Turkey and the Turkish methods of suppression are affairs that concern Turkey alone. The precautionary measures being taken by Turkey to stop any repetition of the uprisings of the past are neither massacres nor are they to be truthfully described as atrocities.

"We, Germans," he says, in relation to the suggestions from the United States and England that Germany should intervene for the protection of the Armenians or be held as sharing in the alleged atrocities, "do not have to render any account either to our enemies nor to the neutral nations over the Turkish methods of handling the Armenian question. Our sole duty at the present time is to be at the side of our ally."

ALLIES CLAIM SUCCESSES ON WESTERN FRONT

LONDON, Eng., October 11.—Following the last German attempts to advance with the aid of gas, liquid flame and asphyxiating bombs, which are reported to have failed, the Allies have had new successes south of the Labassee Canal.

There the Germans are said to have abandoned their attempts to regain territory taken in the recent drive of the Allies, and have suffered a severe reversal in the last forty-eight hours.

Berlin despatches claim gains in the Champagne district and east of Soez. There infantry attacks have resulted in the capture of trenches recently wrested from them, it is said.

Aside from these districts the fighting on the western front is only desultory, artillery duels alone continuing. Comparative inactivity also is reported from the eastern front. The fighting is vigorous only about Dvinsk, the despatches say.

FRENCH ADMIRAL IN MEDITERRANEAN RELIEVED

PARIS, France, October 11.—Admiral Lapeyres, commander of the Anglo-French fleet in the Mediterranean Sea, has been relieved, and Vice-admiral Fournel has been appointed his successor. Announcement of the change says the admiral has been relieved because of serious illness.

BRITISH SEA WASP TORPEDOES TEUTON STEAMER

LONDON, Eng., October 11.—A despatch given out here says the British submarine E-19 has torpedoed the German ship Lulea and adds that the members of the crew were saved in the ship's boats. Where the Lulea was sunk and other details are not obtainable.

TWO STEAMERS SUNK—CREWS SAVED

TAYLOR PLANS TO GET EAR OF CONGRESSMEN

Secretaries of All Representatives Shall Be Kept in Touch With Hawaii's Needs

In order that every man in Congress may be kept in close touch with the conditions of Hawaii, Director A. P. Taylor has written to John R. Desha in Washington, asking him to get the names of all the secretaries of the various congressmen as well as the names of the secretaries of the various chairmen of the congressional committees.

To these committees copies of the Press News Bureau will be mailed regularly, and by keeping in touch with the secretaries of the congressmen Taylor feels that he may at any time be able to launch a vast publicity campaign. This knowledge might also be an invaluable means for pushing through a measure in Congress.

Desha has written asking for all the pictures of Hawaiian scenes which can be spared. He wants these for a banquet of the Press Club of Washington. This is an extremely powerful organization which has members representing almost all the big newspapers throughout the country, and any impression which Desha can make upon them at the banquet will bring golden returns to Hawaii in the way of vast publicity in places where it counts the most. Taylor has already gathered up a mass of material and sent it on to Desha.

Another quantity of photographs of the islands of Hawaii have been prepared by the Hawaii Publicity Committee and are ready to send to L. E. Waterman, the fountain pen magnate, who is such an enthusiastic booster for Hawaii that he keeps a window of his great establishment in New York specially reserved for the display of Hawaiian views.

THINKS WEATHERWAX CAN EASILY BE MADE SEAWORTHY AT DOCK

Belief that the American schooner J. M. Weatherwax can be pitched up and made seaworthy here without sending the ship into drydock, has been expressed by James M. Macconnell, of the Bishop Insurance Agency. Macconnell is local agent for the underwriters.

"I had a cable from the underwriter a few days ago asking them 'if I thought the ship could be repaired, I certainly think she can, and I don't believe it will be necessary to condemn her,'" said Mr. Macconnell.

The insurance man added that he had received no further word from the underwriters concerning disposal of the boat. In view of the fact that most of the ship's crew have filed a libel on the boat for wages and transportation to the coast, it is believed that the boat may be sold at auction here, with such of her lumber cargo as remains salable.

STEAMERS COLLIDE; PASSENGERS HURT

[Associated Press by Federal Wireless] NEW LONDON, Conn., October 11.—The Day State liner Tennessee, with passengers, crashed into the schooner Samuel Sharpe last night, both ships being badly damaged and a number of the Tennessee's passengers being injured in the collision.

For a time there was a fear that the Tennessee had received damages that would sink her and S. O. S. calls were sent out.

The liner Concord responded and the passengers were transferred safely, after which both the damaged vessels put back for New York. It was reported early this morning that both had made port safely. An examination shows that each has had large holes torn into her hull.

BRIGHT'S DISEASE

We proclaim this new FACT IN PHYSICS—Influence the renal tract with an agent that opposes renal granulation and degeneration and urinalysis will, in many cases, within 20 days begin to show diminishing albuminuria in Bright's disease.

The prescription counter having been without an agent to diminish albuminuria (see Tyson page 155) the importance of an Anti-Albuminuric is paramount and manifest.

That albumen can be reduced and that many of those succumbing to Bright's disease can have lives prolonged to other terminations has been established by urinalyses, and confirmed by disappearing symptoms in several thousand cases many involving dropsy and some, tapping.

The presence of albumen being a PHYSICAL FACT and its disappearance a FACT IN PHYSICS, there is no uncertainty as to the results that have been and are being obtained.

The Anti-Albuminuric (Fulton's Renal Compound) can be had at the Honolulu Drug Co. Ask for pamphlet. Current bulletin of recoveries and rationale mailed on application. John

LONDON, Eng., October 11.—The Greek steamer Dimitrios and the British steamer Newcastle have been sunk in the channel by German submarines, but the crews of each ship have been saved.

'DEAD' MAN SITS UP AND DEMANDS LATEST WAR NEWS

Statement That Greeks Will Win Constantinople Rouses Fred Naylor From Stupor

[Special Star-Bulletin Correspondence] HILO, Oct. 8.—Like Mark Twain years ago, long before his death, when he remarked that a little too previous report of his demise was "a trifle exaggerated," Fred Naylor, a well known Hilo man, can repeat the famous remark. Naylor was given up as dead on Tuesday night last, and the word was passed around town on Wednesday that he had departed this life at the Hilo hospital, where he had been conveyed suffering from some sudden attack. He is alive and well, however.

It appears that Naylor was picked up in a semi-conscious condition on Tuesday and was rushed to the hospital. Later his pulse stopped beating and he took on the appearance of a corpse. It seemed all over and people began to ask about the whereabouts of his nearest relatives.

It was early on Wednesday morning that someone happened to mention, while in the "death chamber," that they thought the Greeks would be the first to reach Constantinople. Then came the shock, as Naylor suddenly sat up in bed and, with real Australian directness, declared that the "blankety kangaroos" would be the first to set foot in the Turkish capital. The nurses nearly fell dead with surprise, the doctor staggered as if he had been smitten by a hand grenade, and Naylor, sitting up in bed, begged that the latest war news be detailed to him at once. "You don't think a bloke would die at a time like this and never know the result of the big war, do you?" was his concluding remark as he lay back on the pillows and called for today's news.

Naylor served with the Australian contingent in the Sudan 20 years or so ago, and he takes the deepest interest in the present struggle.

WILSON AND HIS FIANCEE ATTEND DIVINE SERVICE

French President, Among Many Others, Sends His Congratulations

[Associated Press by Federal Wireless] WASHINGTON, D. C., Oct. 11.—President Wilson spent all day yesterday with his fiancée, Mrs. Norman R. Galt, by whom he had been accompanied the previous day to Philadelphia to witness the second championship baseball game between the Boston and Philadelphia.

Sunday morning the engaged couple motored to Baltimore, where they attended church, later having lunch with the family of Joseph B. Wilson, the president's brother. Later they motored back to Washington.

On Saturday and yesterday a number of messages to the president, congratulating him on his engagement and approaching marriage, were received from the heads of a number of foreign states. The first such message received was from President Poincaré of France.

NATURALIZATION SCHOOL PLANNED IN COLORADO

DENVER, Colo.—To organize naturalization schools for adults working in coal mines, a conference will be held in Las Animas county Oct. 11 to 17, inclusive.

Representatives of the sociological department of the Colorado Fuel & Iron company, the county superintendents of schools, the city school superintendent of Trinidad and Mrs. Mary C. C. Bradford, superintendent of public instruction, will be present.

Besides plans for the new naturalization school, there will be discussion as to the best methods of sociological and educational betterment of the schools in Huerfano and Las Animas counties.

The conference will move from town to town and will visit practically all the coal camps in the southern field.

BUILDING PICKING UP

Permits for buildings have been issued at the building inspector's office during the latter part of last week as follows: October 7, George Smith, dwelling, \$180; E. J. Sanford, dwelling, \$700; S. Aspinwall, dwelling, \$125; W. C. Woodward, residence, \$1650; Lale Plantation Company, laundry, \$500; T. Sunida, tenement house, \$1250; T. Oshima, dwelling, \$750; F. H. Fernandez, dwelling, \$350; M. Ozaki, hat store, \$250; Peter Kahua, dwelling, \$400; E. Cushingman, residence, \$2200. Several permits for alterations to houses and other buildings have also been filed.

The three-masted schooner Minnie Slouison, New York for St. Johns with coal, rammed a lightsail on the Massachusetts coast and sank.

BELGRADE FALLS UNDER BATTERING OF TEUTON GUNS

Entente Powers are Rushing Troops to Aid of Serbia Through Greece

[Associated Press by Federal Wireless] LONDON, England, Oct. 11.—The Austro-German army of invasion is in full possession of Belgrade, the Serbian capital, and three-fourths of the city is reported to be in ruins. Advances here say the Austro-Germans are in possession of the heights surrounding the capital as well as the city itself.

Paris is authority for the report that three-fourths of the city has been destroyed. Six thousand shells were rained in on Belgrade, according to this report, and many historic places are now crumbled ruins.

Berlin Says Damage Small. Despatches from Berlin, while not contradictory, are not as positive. A German report says:

"Despatches from the Serbian front say that Belgrade has been damaged by the heavy bombardment of the last week, but that the damage is small. Part of the civilian population remains."

Petrograd reports that submarine bases have been established at Varna and Burgas.

Allies Rushing Troops. The British and French continue to pour in fourteen thousand troops a day at Saloniki, Greece, and these forces are being despatched to the Serbo-Teutonic front as rapidly as they land.

In this connection the Mail this morning publishes an editorial which declares the time is ripe for systematic and strong aid to the Serbians. It is no time for repetition of previous mistakes, the editorial says.

"Inadequate help to Serbia," the editorial declares, "will be no help. The situation there demands a great army. It is a big and perilous operation and we do not desire a new version of previous errors of judgment."

A Reuters despatch from Athens gives new light on Bulgaria's entry in the war. A statement is made by the German legation at Athens that there is no truth in the report that Germany had a secret treaty with Bulgaria. The Bulgarians have become allies of Germany because they believe Germany's cause is just and think the Teutons will win the war, the statement concludes.

DOLLAR'S WORTH OF DRUG ONLY BIT OF EVIDENCE

Deputy Marshal Otto Helme returned from Hilo Saturday with one Fun Tan, charged with having opium in his possession. The deputy marshal had no trouble in locating Fun Tan on the Big Island but as evidence he was able only to secure a tiny bit of the poppy drug valued, the marshal estimates, at about \$1.
